How a Woman Wore Expensive

Dresses Which Cost Her Nothing.

They were luuching at the Richelton and talked louder than they intended. One was exquisitely begowned and the other was congratulating her on her appearance, says the Chicago Post,

" But it must have been very expensive, that gown," she said. " Didn't cost me a cent," said the other

with a smile.
"Why, what do you mean?" queried you understand? Why, I went to Field's and picked is

"Why, I went to Field's and ploked it out, and they sent it home for approval.
"It satisfies you?"
"Perfectly."
"Then it will cost you something."
"Not a cent. It came yesterday. I am going to make some calls to-morrow. I shall wear it and to-morrow send it back."
The other didn't raply. And the beau.

The other didn't reply. And the beau-tifully begowned one continued:

"It is a perfect dream of a scheme, Whenever one wants to be a little swell, one can do as I have done and without cost. To be sure one mustn't go too often, and once in a while one must buy a gown. But doing as I, yes, and as many others do, for the price of one gown, one can have the use of several. Only one must be careful not to commit the error a friend of mine did."

"What was that?"

"Why, she took a gown and kept it several days. Of course gowns sent on approval are not expected to be worn. But the clerk who received it and found in a pocket the lady's card case and pinned inside the waist a letter received from a gentleman friend, must have had his suspicion aroused that the gown at least had been worn. I don't know what word was sent back with the case and letter, but I do know that she doesn't give Field the benefit of her custom any more."

Whereat both laughed heartily and calling the waiter, ordered two pieces of pie.

A CHICAGO SOLOMON

He Settles a Difficulty in Regard to Mixed Children.

A famous Chicago lawyer once had a singular case to settle, says the Boston Gazette. A physician came to him in great distress. Two sisters, living in the same house, had babies of equal age, who so resembled each other that their own mothers were unable to distinguish them

when they were together.

ness of the nurses the children had become mixed, and how were the mothers to make sure that they received back their own infants? 'But perhaps," said the lawyer, "the

"But perhaps," said the tawyer, the children weren't changed at all."
"Oh, but there's no doubt that they were changed," said the physician.
"Are you sure of it?"
"Perfectly."
"Well, if that's the case, why don't you change them back again? I don't see any difficulty in the case."
